### JOB DESCRIPTION:

Attollo Engineering is seeking an experienced and knowledgeable Quality Inspector to join our growing team and help us continue our legacy of success. Attollo Engineering is a designer and manufacturer of cutting-edge infrared cameras and instruments for defense and industrial applications. Attollo provides competitive salary compensation, a generous benefits package, and 401K matching.

The Quality Inspector will play a critical role in the incoming and outgoing quality control of our product. The ideal candidate should have significant experience using inspection tools, writing non-conformances, reading drawings and purchase orders, and reviewing process certifications for small mechanical, electrical, and optical components.

### ROLE AND RESPONSIBILITIES

- Work with manufacturing, engineering, and operations personnel on non-confirming product inspection
- Perform incoming, in-process, and final inspections
- Perform Internal audits on product as required
- Interact with business database systems to report and record inspection data
- Ensure all tools being used are within calibration
- Handle FOD and ESD sensitive material
- Gown up in a cleanroom to perform inspections as required
- Review paperwork, drawings, and specifications to ensure product is compliant to the requirements

### QUALIFICATIONS AND EDUCATION REQUIREMENTS

- High School diploma or equivalent
- Fluent English (reading and writing)
- Competence in basic measuring tools: Calipers, Micrometers, height gauges, etc.
- Knowledge of Statistical Process Controls (SPC) and Acceptable Quality Limit (AQL) Standards
- At least 2 - 5 years of experience as a quality inspector or related role
- Familiarity with Microsoft Excel
- Excellent organizational and multitasking abilities.
- Detail-oriented with the ability to identify and flag nonconformances
- Experience working with Optics, Electronics, and small assemblies.

### PREFERRED SKILLS

- Familiarity with AS9102 inspection reports a plus
- Current IPC-A-610 certification
